Tolerance Zone

(A.R.S. 40-360.21 definitions, #4, Careful and Prudent Manner)
 The Tolerance Zone in Arizona includes the width of the facility (if indicated) plus 24" measured from each side of the marked facility. Excavation taking place within this tolerance zone requires that the facility must be carefully exposed with hand tools, and the uncovered facility must be supported and protected at all times during the excavation.

**During excavation involving boring equipment additional rules may apply. Ask affected facility operators for their specific safety requirements.
