City of Eloy
Impact Fee Annual Report
For the Fiscal Year Ended June 30, 2020

INTRODUCTION

This report is designed to fulfill the requirements of Arizona Revised Statutes (ARS), Section 9-463.05 (N). It contains information concerning the City of Eloy's collection and use of development fees. The information contained in this report is based on the City's fund financial statements but it is unaudited data.

The annual report must be submitted to the City Clerk and posted on the City's Web site within 90 days following the end of the fiscal year. If the report is not submitted and posted within the 90 days, the City cannot collect development impact fees until the report is submitted and posted. ARS refer to the fees as "development fees"; the City refers to them as "development fees."

TischlerBise performed the development fee study. Due to substantial changes in state law concerning Development Impact Fees (Senate Bill 1525), the City renamed and eliminated many of the development impact fees charged. Although no longer charged, several of these categories have remaining balances that continue to be tracked separately and utilized for their legally intended purposes. Development fees are charged per dwelling unit for all residential construction. Commercial projects are charged based upon their impact on each service provided and are generally charged on a per square foot basis.

This report includes unaudited schedule of sources and uses for each type of development fee assessed by the City of Eloy along with beginning and ending fund balances, the amount of interest earnings in each fund for the fiscal year, and the amount of development fee monies spent on each capital improvement project and for each purpose other than a capital improvement project.

Pursuant to ARS, the annual report must contain the following information.

1. The amount assessed by the City for each type of development fee.
2. The balance of each fund maintained for each type of development fee as of the beginning and end of the fiscal year.
3. The amount of interest or other earnings on the monies in each fund as of the end of the fiscal year.

City of Eloy
Impact Fee Annual Report
For the Fiscal Year Ended June 30, 2020

4. The amount of development fees used to repay:
 - a. Bonds issued by the City to pay the cost of a capital improvement project that is subject of a development fee assessment, including the amount needed to repay the debt service obligations on each facility for which development fees have been identified as the source of funding and the time frames in which the debt service will be repaid.
 - b. Monies advanced by the City from funds other than the funds established for development fees in order to pay the cost of a capital improvement project that is the subject of a development fee assessment, the total amount advanced by the City for each facility, the source of the monies advanced and the terms under which the monies will be repaid to the City.
5. The amount of development fee monies spent on each capital improvement project that is the subject of a development fee assessment and the physical location of each capital improvement project.
6. The amount of development fee monies spent for each purpose other than a capital improvement project that is the subject of a development fee assessment.

ARS states that a municipality may assess development fees to offset costs to the municipality associated with providing necessary public services to a development. As of and during fiscal year ended June 30, 2020 the City of Eloy has assessed and collected development impact fees for the following public services.

- Parks and Recreational Facilities
- Police Facilities
- Water Facilities
- Wastewater Facilities
- Streets Facilities

This report is hereby submitted to the City Clerk and is in compliance with ARS Section 9-463.05.

Brian Wright, Finance Director

City of Eloy
Impact Fee Annual Report
For the Fiscal Year Ended June 30, 2020
